Tomato	4.20	5.00
Umbu	8.00	9.00
Water Melon	7.50	8.00

Notes

These values, except where otherwise stated, are defined by the Code of Practice of the European Fruit Juice Association (AIJN). The values for from-concentrate juice match or exceed current minimum Brix values as defined by Directive 2012/12EU and The Fruit Juices and Fruit Nectars (England) Regulations 2013.

(1) Minimum Brix values for these fruits are not currently defined by the AIJN or regulatory standards. These figures for these fruits are quoted from the Codex General Standard for Fruit Juices and Nectars (Codex STAN 247-2005)

(*) There are currently no defined Brix values for these within the AIJN, Codex or Regulatory standards. For juices from concentrate, the minimum Brix "shall be the Brix level of the juice as extracted from the fruit used to make the concentrate" in accordance with Annex I(1)(b) of Directive 2012/12/EU.

This document is provided as an indicative guideline that is current to the best of our knowledge at the date of issue.
